LIFE SAGA 65m

by ADMIRAL

Life Saga is the name of the 65-m megayacht signed by Admiral. The flagship brand of The Italian Sea Group is one of the largest conglomerates in international yachting focusing on the construction and refit of motoryachts and ships up to 140 meters.

Absolute continuity between outdoor/indoor spaces creates an extra-long open-plan sequence of uses

Admiral is world-renown for their prestigious and elegant yachts and offers high quality standards in the design and production of customizable motor-yachts that meet each owner's expectations, thanks to an important stylistic culture and a competent internal design team.

Life Saga is characterized by elegance and contemporary lines. She was born from the collaboration of Admiral, a reference point of 'Made in Italy' excellence, and professionals of the naval sector such as architect Gian Marco Campanino, who oversaw the design of the exterior and the internal layout, and Mark Berryman, who developed and materialised the interior concept. Life Saga is the perfect combination of aesthetics, style and innovation.

Absolute continuity between outdoor/indoor spaces creates an extra-long open-plan sequence of uses, from sunbeds to a lounge/bar/game room to a panoramic relaxing lounge. Full height sliding/retractable glass doors, foldable balconies and openable windows provide the possibility to live in a unique "hybrid environment" that is both indoor and outdoor.

The dining room “rotunda” works as a filter between the outdoor lounge area and the indoor cinema-salon, reducing the conventional in/outdoor separation, thanks to huge, sliding, curved glass walls, that disappear completely. Floor to ceiling windows and glass walls are the signature of the style of this yacht; the design brief was to have something masculine and bold whilst elegant and not heavy-looking. The distinctive architectural element in the centre part of the silhouette gives this yacht a “modern villa” flavour with unrivalled sea views, similar to a steel & glass tall building made of large glass slabs with no detailing.

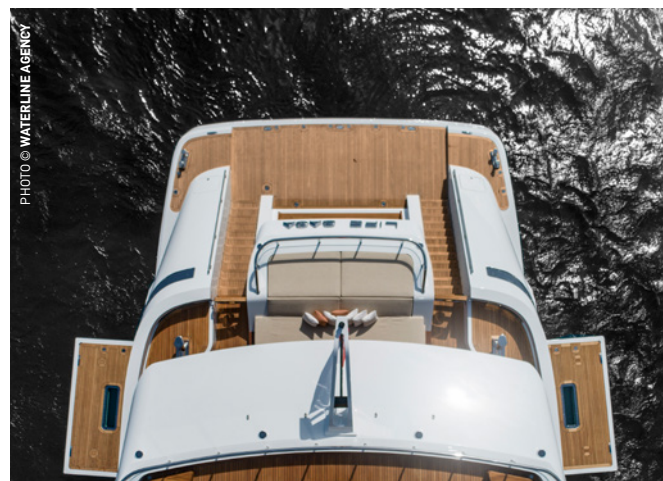

The yacht sundeck features large comfortable spaces, large sun pads and a bar area connected to the two swimming pools on the deck. Spacious and functional is also the beach area equipped with all mod cons, ranging from a spa to a gym and two lateral foldable beach platforms. The interior furnishings of Life Saga are designed to interpret the concept of relaxation and well-being through a careful selection and combination of materials and finishes so as to offer stylistic continuity between indoor and outdoor spaces.

All the materials, precious and natural, are skillfully mixed and feature leather, used for both the internal and external furnishings, combined with natural oak finishes and walnut and teak details so as to offer a relaxed feel on board. A harmonious contrast results from the introduction of stone: excellent travertine marble, exclusive onyx sunset, elegant emperador marble.

SPECIFICATIONS

BUILDER / NAVAL ARCHITECT	Admiral The Italian Sea Group
EXTERIOR DESIGNER	GMC ARCHITECTURE
INTERIOR DESIGNER	Mark Berryman
HULL	Steel
SUPERSTRUCTURE MATERIAL	Aluminum
LOA	65 m
BEAM MAX	10.6 m
